

CAREER OBJECTIVE

Motivated and enthusiastic Computer Science student seeking an internship opportunity to enhance technical skills, gain practical experience, and contribute effectively to organizational growth.

EDUCATION

B.Tech, Computer Science & Engineering
SR UNIVERSITY WARANGAL

2024 - 2028

TRAININGS / CERTIFICATIONS

Python Programming

Mar 2026 - Apr 2026

CISCO, Virtual

Learned Python programming basics, data types, functions, and problem-solving concepts through practical exercises.

Web Development Traini

Feb 2026 - Present

Cisvi, Virtual

Learned fundamentals of HTML, CSS, JavaScript, and responsive web design. Developed basic frontend web pages and improved problem-solving skills.

PROJECTS

Student Management System

Apr 2026 - May 2026

• Developed a simple student management system using C programming. • Implemented features to add, update, delete, and display student records. • Improved problem-solving and programming skills through this project.

Library Management system

Feb 2026 - Mar 2026

Designed a modern and user-friendly Library Management System prototype using Figma. Created intuitive interfaces for book search, issue and return management, member registration, and library administration. Focused on improving user experience through clean layouts, easy navigation, and responsive design principles. Developed wireframes, interactive prototypes, and visually appealing screens to streamline library operations and enhance usability.

Plant health detection by colours

Jan 2026 - Feb 2026

Developed a plant health detection system that analyzes leaf color patterns to identify the health condition of plants. The project uses color-based analysis to distinguish between healthy and unhealthy plants, helping in the early detection of plant diseases and nutrient deficiencies. Focused on improving agricultural monitoring through accurate and efficient plant health assessment.

Mobile App UI Design

Mar 2026 - Apr 2026

Designed user-friendly mobile application interfaces using UI/UX principles. • Focused on clean layouts, color combinations, and user experience. • Improved creativity and design thinking skills.

Impact of screen time on mental health

Feb 2026 - Mar 2026

Developed a machine learning-based system to analyze the relationship between screen time and mental health. Collected and processed data related to screen usage patterns and psychological well-being, then applied machine learning techniques to identify trends and predict potential mental health impacts. The project aims to provide data-driven insights that can help promote healthier digital habits and improve overall well-being.

SKILLS

- C Programming
- Data Visualization
- Amazon Web Services (AWS)
- Computer Networks
- Frontend development
- Python
- Data Cleaning
- Canva
- JavaScript
- Google Colab
- Data Structures
- Data Preprocessing
- Cloud Computing
- Data Analysis
- Machine Learning

- UI & UX Design
- Web development

ADDITIONAL DETAILS

- > Passionate Computer Science Engineering student with knowledge in C, Python, DBMS, Data Structures, Web Development, HTML, CSS, JavaScript, Computer Networks, and UI/UX Designing. Quick learner with good problem-solving, communication, and teamwork
